

A decorative graphic in the top-left corner consisting of several orange circles of varying sizes arranged in a roughly triangular pattern.

Tobii Pro Eye Tracker Manager Release Notes

Version 2.3.7

Release date: 22 March 2022

New features and improvements

- Fixed an issue that prevented users to access some features of Tobii Pro Fusion 60 Hz edition (advanced screen set-up option, monocular calibration option, visualize eye images option)
- Small adjustment to the simple screen set-up calculation, that could positively impact the data quality after you redo your simple screen-set up

Limitations

- Eye Tracker Manager does not support mirrored screen setup as Pro Eye Tracker Manager is not sure what screen size is used
- In case of having several users on a Mac, only one of the users can run Pro Eye Tracker Manager
- Logs are not available for Pro Fusion on Linux

Known issues:

- Recalibration sometimes fails
- Calibration sometimes fails with Tobii Pro Fusion on Linux
